FIRE-FIGHTING INSTRUCTIONS: Fire extinguishing method and extinguishing agent: Fire fighters must wear filter type gas mask (full cover) or isolated respirator, and wear full body fire protection suit to put out the fire upwind. Remove the container from the fire as much as possible into an open area. Spray water to keep fire containers cool until extinguishing is complete. Evacuate immediately if the container in the fire has changed colour or produced sound from the safety relief device. Extinguishing with water, dry powder, foam or carbon dioxide extinguisher.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

EMERGENCY TREATMENT: Emergency treatment: It is recommended that emergency treatment Personnel wear air-contained breathing apparatus, anti-static clothing, and rubber and oil-resistant gloves. Do not touch or cross the spill. All equipment used during operation should be grounded. Cut off the source of leakage as much as possible. Eliminate all ignition sources. Delimit the warning zone according to the influence area of liquid flow, steam or dust diffusion, and unrelated personnel should evacuate from the crosswind and upwind to the safe zone.

SMALL SPILLS: Collect leaking liquids in airtight containers where possible. Absorb with sand, activated carbon or other inert materials and transfer to a safe place. Do not flush into drains.

LARGE SPILLS: Build a dike or dig a pit for shelter. Close the drainage pipe. Cover with foam to prevent

evaporation. Use explosion-proof pump to transfer to tank truck or special collector, recycle or transport to waste disposal site for disposal.

SECTION 7 – HANDLING AND STORAGE

HANDLING PRECAUTIONS: Supply with sufficient partial air exhaust. The operating staff must have received special training and abide by the operating regulations. Avoid contact between eyes and skin and avoid breathing in steam. It is advised that the staff wear respirator, wear work clothes, and wear gloves. Keep away from the fire source, heat source, no smoking in the workplace. Avoid producing dust. Use explosion-proof type ventilation system and device. Avoid contacting with oxidizer and strong acid. Equip with relevant types and quantities of extinguishment instruments and device for divulgence handling. Empty the container which may include harmful material.

STORAGE REQUIREMENTS: Stored in a cool, ventilation of the treasury. Away from fire, heat source. With the oxidant and acid stored separately, avoid mixing reservoir. Equipped with the appropriate variety and quantity of fire equipment. Storage areas should be equipped with emergency treatment equipment for leakage and suitable housing materials.
